

SPECTROLINE

SB-100 Series

Super-High-Intensity Ultraviolet Lamps

Designed for maximum efficiency and versatility. The SB-100P UV lamp produces super-high UV intensity without excess visible light! Developed to make your work easier, the SB-100P is precision-engineered for use in countless applications. It is perfect for nondestructive testing, quality control, UV curing, leak detection and much more.

SB-100P

Combines new state-of-the-art innovations with proven features. The SB-100P was designed with the needs of the industry in mind. Its lamp head and transformer base housings are constructed of a rugged engineering polymer that virtually eliminates dents, cracks and scratches. The cord comes out of the stay-cool, contoured handle, which prevents tangling, and the crack-resistant, tempered filter dramatically reduces replacement costs. The lamp head easily lifts from the metal handle of the transformer base for comfortable hand-held use. For bench use, it can be conveniently rotated 360° in both vertical and horizontal positions when mounted on the base handle.

Unique Bulb-Saver™ extends bulb life.

To greatly reduce replacement costs due to broken bulbs, we include our unique Bulb-Saver at no extra charge. It minimizes bulb movement during normal handling, reducing the risk of breakage.

Tough, dependable and safe.

To reduce shock hazard, the SB-100P comes equipped with a special heat-resistant, 3-wire secondary cord and a fully enclosed encapsulated ballast. The primary and secondary cords are both 8-feet (2.5 m) long. Also available are the SB-100PX which comes with a 20-foot (6m) secondary cord and the SB-100PXR which is equipped with 20-foot primary and secondary cords. The lamp head is only 7 1/2 inches (19 cm) long and weighs just 2 1/2 lbs. (1.1 kg). The SB-100P is UL listed and CE approved; a CSA-approved version is also available. The entire unit, including the transformer base, weighs 11 1/2 pounds (5.2 kg).

Flexible, silicone rubber filter holder.

The filter holder is easily removable without tools for bulb or filter replacement.

FREE UV-absorbing glasses included with every lamp.

The SB-100P, SB-100PX, SB-100PXR lamps
are available for these line voltages:

120V/60Hz 230V/50Hz 240V/50Hz 100V/50-60Hz

SB-100PR High-Intensity Ultraviolet Lamp with 30 Foot Retractable Cord

SB-100PR

Now, we've combined the high performance features of our SB-100P high-intensity ultraviolet lamp with the operator convenience only a "flying reel can provide. With its 30 foot retractable cord, the Spectroline SB-200PR lamp assures that no job will ever again be out of reach.
